Our Specialty—Daffodils for Naturalizing

Dear Friends and Gardeners:

Again we greet you and wish you "Happy bulb growing!" As usual we are offering for sale Holland-grown tulips, hyacinths, iris, crocus, and minor bulbs and our native daffodil bulbs grown in the Holland-like coastal plain of Tidewater Virginia.

We have been fortunate in having a good bulb growing season this spring, and we are proud to be able to offer you a good crop of nice fat, healthy daffodil bulbs grown in our fifteen-acre plantings. We recommend our daffodils for formal plantings in bulb gardens or borders and for informal plantings to give the effect of beautiful spring wildflowers in "naturalized" plantings on hillsides, in meadows, by lakes, or in light woods.

For planting in a small space it is interesting to buy a collection of a number of varieties, such as we offer on page 4 of this list. For naturalizing we suggest our bulbs as sold by the bushel or peck. Our mixtures give a succession of bloom over a period of four to six weeks. Of course a selection of all one variety will give a more brilliant effect while it is in bloom. Giant trumpet types are more showy, smaller flowers will bloom well a greater number of years without the bulbs having to be dug and replanted.

Sincerely,

(MRS.) SELINA L. HOPKINS.

WE PREPAY ALL CHARGES on all bulbs, including our bushel and peck offers, to all points EAST OF THE MISSISSIPPI RIVER. CUSTOMERS LIVING WEST OF THE MISSISSIPPI RIVER will please add ten per cent to our prices for DAFFODILS to help with transportation charges. (This is necessary because daffodil bulbs are heavy, and the cost of transporting them is quite high.) Tulips and all other bulbs will be sent any place in this country postpaid.

MINIMUM ORDERS: One-half bushel may be bought at the bushel rate. Six or more bulbs may be bought at the dozen rate and 25 bulbs at the 100 rate.

GUARANTEE: Our bulbs are guaranteed to reach you in firstclass condition. Packages should be opened at once on arrival and examined. Any molded bulbs reported within 10 days of receipt will be replaced free of charge.

PRICE LIST: If you do not intend to plant bulbs this year, you will do us and one of your friends a favor by passing this list on to another gardener.

WHEN TO PLANT ALL BULBS: Daffodils may be planted from Sept. 1 to Nov. 15 or until freezing weather sets in, but early planting is an advantage to them. Oct. 1 is early enough to start planting tulips, iris, crocus, hyacinths, and

minor bulbs, and these also may be planted up until time for the ground to freeze. In order to insure that a good selection of bulbs will still be available you should place your order as early as possible however.

DELIVERY: We start to fill our accumulated orders of daffodil bulbs about September 1. The tulips, crocus, hyacinths, and minor bulbs which we are offering for sale are Holland-grown. Orders for them will be filled as soon as possible after we receive our shipment from Holland, which should be by October 1.

DEPTH TO PLANT: Daffodils and hyacinths base 6 or 7 in. deep; tulips 4 in.; crocus and minor bulbs 3 in. deep.

COMPLETE CULTURAL INSTRUCTIONS will be inclosed in each order. Bulbs are easy to grow and will reward you richly for your effort.

LABELING VARIETIES. All varieties sold individually or in collections are separately packaged and labeled. Varieties sold in mixtures are not separated.

RIVER'S EDGE NATURALIZING DAFFODILS

Daffodils are Harvested at River's Edge Farm

Reprinted from Richmond Times-Dispatch, April 1, 1951

Mrs. Selina Hopkins, of River's Edge Flower Farm admires a bunch of choice daffodils gathered from one of her fields.

BY-HAMILTON CROCKFORD Times-Dispatch Staff Writer

NUTTALL, VA., March 31—Mrs. Selina L. Hopkins just about abandoned housekeeping a couple of weeks ago and took to gathering posies. Lunch will continue to be irregular or missing for three weeks

It wasn't simply a walkout, or just Spring fever-although that had something to do with it:

The daffodils had it. Here in Gloucester County they were bursting into bloom again. (The daffodil show at Gloucester is on today and to-

Everybody in Gloucester County has a daffodil patch. Mrs. Hopkins has some 15 acres of them.

Bread and Beauty

And since they supply her table with bread as well as beauty, picking posies in March for her has only an incidental resemblance to gathering nuts in May.

So, beauty being fragile, business on her "River's Edge" flower farm here, a couple miles east of the courthouse, is bustling these days—everywhere except the kitchen.

Every clear morning the pickers show up at her fields. Every afternoon a truck shows up at her packing house for a shipment to go somewhere.

And every day, all day, an elderly widow turned business woman gets about to all corners of the place to supervise the operations from pick-

ing to packing.

If it's a frosty morning, the daffodils will have their heads down, and there's no picking then. But when

they look up and dance in glee like Wordsworth's, beside the North River here, the nimble-fingered pickers must move fast.

Money for Pickers

[There's money in it for the pickers, while it lasts, at 2 cents per bunch of a dozen, 25 bunches to the basket, and some people picking 20 baskets in a day's working time, the owner observed.]

The job must be done by noon, if possible, Mrs. Hopkins noted, to leave enough time for cooling the flowers to stiffen their stems, and for packing before the truck comes. She drives her car out into the fields to direct the work.

The baskets go into troughs of water to stay until the stems are "cool to the hand." Then the packers take over, gently placing them 30, 36 or 50 bunches to the box, according to the size of the flower variety, and bracing it to be sure the blossoms don't bruise.

While this is going on, the phone may be ringing with a long distance order from somewhere, and Mrs. Hopkins will be off into the house to take it.

A daily broadcast of prices in New York is also "must" listening for her or her son-in-law and daughter, Mr. and Mrs. C. H. Hammer, who live with her, and grow more daffodils of their own.

Market Perishable

The market can be as perishable as a daffodil, if there's a temporary glut in one place: The New York price dropped from 50 cents a dozen on a Saturday to 10 cents by the

Workers Pick Daffodils on River's Edge Farm

Mrs. Hopkins Superintends Packing of Daffodils

next Thursday, they noted. They shifted destinations, accordingly, just before truck time.

Mrs. Hopkins, who moves unruffled through this melee, got into flower farming on her own rather later

An aunt of actress Katherine Hepburn, she was born Selina Hepburn, the daughter of a Hanover County Episcopal minister, in 1878, and married N. S. Hopkins in 1900.

From general farming on his family's old place here, "Waverley," on his first owned by Philip Edward Tabb, he went into bulb growing seriously about 1922. He developed a couple of varieties himself. Meanwhile, Mrs. Hopkins observed with a smile, genealogy and Gloucester County history were her chief occupations.

But when her husband died in 1937, and her four children wondered what she ought to do, she decided simply. "It was the only living I had," she said. She turned to daffo-

She'll be 73 on April 9, but it's easy to agree with her own summing up, that "getting outdoors with the flowers agreed with me."

She sells a dozen or so commercial varieties and a few boxes each year of an estimated 100 other varieties.

And while she'll be getting back to a little more housekeeping after about April 20, she won't tarry long at a time.

Has Bulb Trade

She's worked up a bulb trade, too, and does about as much business selling the increase of her bulbs in the Fall as selling flowers in Spring.

Selling only to home gardeners and florists rather than large wholesalers, she's shipped them now to every State except Montana, she said. (Everything goes out with a tag noting the bulbs were State-inspected and found free of the plaguish ellworm and narcissus bulb fly, Hammer pointed out.) And she "grades mer pointed out.) And she bulbs with the boys all summer.

They have to be dug every one to four years, she noted, and where they grew the fields must be planted alternately to soybeans and Winter clover, sometimes for two years, and these turned under, until the ground is right for bulbs again.

After cleaning, drying, chemical treating and curing, the bulbs for re-planting go back in the ground from September to Christmas. It's a yearround business.

"The only time I get any peace at all is when I get them all patted down in the ground in the Winter,' Selina Hopkins said,—"And then I have to work on my income tax."

But she was smiling at a cluster f her "Magnificence" when she of her when she

said it.
